

POINT OF CARE | INFECTIOUS DISEASE | HAEMOGLOBINS | CLINICAL CHEMISTRY

# Legionella Rapid 2<sup>nd</sup> Gen

## UniGold™ Legionella Urinary Antigen PLUS

Greater specificity giving enhanced performance

**NON-INVASIVE:**

- Sample type is urine

**SIMPLE:**

- Easy procedure – 3 steps
- Easy interpretation

**RAPID:**

- Result in 15 min
- Ready to use

**RELIABLE:**

- Excellent sensitivity and specificity
- Built-in control in each strip
- LUA controls provided
- Objective qualitative results
- High performance and quality

**Prompt diagnosis means an early start to correct therapy**

**Detect *L. pneumophila* serogroup 1 Antigen in urine**

# Disease and Specifications

*Legionella(L) pneumophila* is a common cause of community acquired and nosocomial pneumonia. *L. pneumophila serogroup 1* causes the majority of Legionellosis (85%). The mortality rate associated with infection due to Legionella is 20% for community acquired and 40% for nosocomially acquired pneumonias. Early diagnosis and initiation of appropriate antimicrobial therapy can significantly reduce the mortality associated with *Legionella pneumonia*.

The UniGold™ Legionella Urinary Antigen rapid gives non-invasive qualitative detection of antigens specific to *L. pneumophila serogroup 1* in urine.

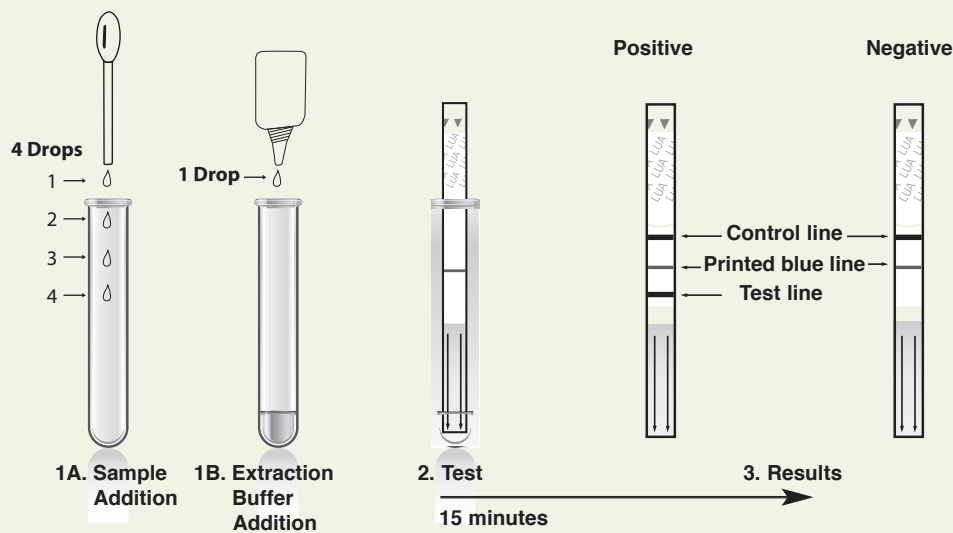

## PERFORMANCE<sup>12</sup> UNIGOLD™

SENSITIVITY	Unconcentrated urine	82%
	Concentrated urine	91%
SPECIFICITY	Unconcentrated urine	99%
	Concentrated urine	98%

## Sample Preparation

Use the recommendations of the local reference centre.
